Two Visions, One Founder: Yusuf Ferhat Demir Digitizes Everyday Companionship and the Beauty Industry

With Alltagsengel and ChairMatch, Frankfurt-based entrepreneur Yusuf Ferhat Demir launches two innovative platforms set to transform traditional industries.

Alltagsengel — Digital Everyday Companionship Under German Social Law (§45a SGB XI)

Alltagsengel UG (haftungsbeschränkt), based in Frankfurt am Main, Germany, is on a mission to simplify everyday companionship for people in need of care and their families. Through alltagsengel.care, users can find qualified everyday companions who provide support in daily life — from shared walks and grocery assistance to companionship and supervised activities.

The statutory relief allowance of €131 per month (§45b SGB XI) can be applied directly to Alltagsengel's services. **Important:** Alltagsengel offers everyday companionship under §45a SGB XI — not nursing care.

ChairMatch — The Chair Rental Platform for the Beauty Industry

With ChairMatch (chairmatch.de), Yusuf Ferhat Demir simultaneously launches a digital platform that is set to revolutionize the beauty industry. ChairMatch is the first digital marketplace for chair rentals in hair salons, barbershops, and beauty studios. Salon owners can rent out unused workstations while freelance stylists and beauticians find flexible workspaces — without long-term lease commitments.

The concept follows the sharing economy model: existing resources are used more efficiently, and both sides benefit. ChairMatch handles matchmaking, scheduling, and digital processing.

"In both everyday companionship and the beauty industry, there is enormous potential for digitization. With Alltagsengel, we give people in need of care and their families a piece of their quality of life back. With ChairMatch, we create new freedoms for creatives in the beauty world. Both projects share the same conviction: technology must serve people."

— Yusuf Ferhat Demir, Founder and CEO
